-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 8-18, drawn to process, classified in class 427, subclass 162.
 - II. Claims 1-7 drawn to product, classified in class 359, subclass 742.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case that the process as claimed can be used to make another and materially different product such as one that is not a pre-determined geometrical configuration.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

3. During a telephone conversation with S. Harrington on 11-12-04 a provisional election was made without traverse to prosecute the invention of group I, claims 8-18. Claims 1-7 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant's election without traverse of Group I in the reply filed on 12-14-04 is acknowledged.

Claim Rejections - 35 USC 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 8-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mau et al.

Mau et al appears to disclose a process of manufacturing decorative material including the step of providing a Fresnel lens and applying an opaque coating to at least first portions of the lens to provide second portions of the lens separated by an opaque

surface (para 0043; fig 3a, 3b, 4). Mau also teaches the use of screen printing, offset printing, gravure printing, and flexographic printing (para 0035, 0043). There is disclosed use of first and second colors.

There is not disclosed providing a plurality of Fresnel lenses.

It would have been obvious to one with ordinary skill in the art to include a plurality of Fresnel lenses because Mau teaches that it is known in the prior art to cut up a lens into pieces, thus creating a plurality (para 0003).

6. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mau et al as applied to claims above, and further in view of Enlow et al.

Mau et al does not disclose ink jet printing.

Enlow et al discloses ink jet printing (para 0104)

It would have been obvious to one with ordinary skill in the art to include in jet printing because Enlow et al teaches equivalency in the art (para 0104).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
